

# The fully comprehensive online exam experience for higher education

# Assess students how they learn – digitally – and ease the burden for your academics and institution

**Create**

**Manage**

**Deliver**

**Invigilate**

**Mark**

**Scale**

BetterExaminations is a comprehensive solution that includes sophisticated examinations creation, workflow, management, a secure and accessible testing platform, and accurate and scalable Machine learning invigilation.

Delivering exams online isn't just about digitising paper exams. It's about using advanced technology to create a secure, dependable and verifiable online examination experience for both students and staff.

With BetterExaminations's suite of exam tools, exam authors can create and deliver exams online that are as simple or complex as needed. Once the exam is made available, students can take the exam securely online with invigilating software powered by machine learning to guarantee exam integrity.

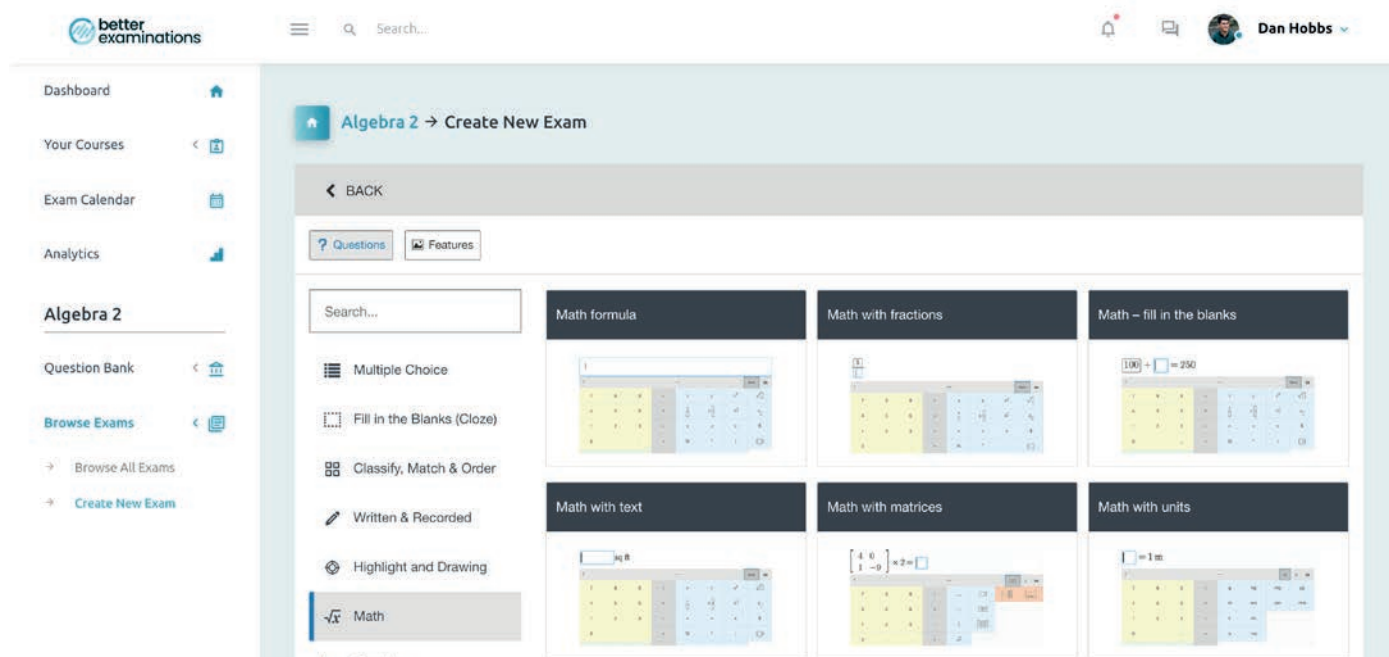

A young man with short, dark, curly hair is shown in profile, looking out of a large window. He is wearing a dark t-shirt and a backpack. The window has vertical frames, and the view outside shows a bright, cloudy sky. The overall tone is bright and hopeful.

## **BetterExaminations is an all-in-one solution that knows higher education and drives student success and institutional performance.**

A smart solution to assess your students solves common issues like:

- Major running costs and lack of scalability
- Lack of standardisation across departments
- Ineffective processes that waste time
- Pedagogical disconnect for students who use digital technology to learn but take paper exams
- Misplacing material/human error
- Too many stakeholders and back-and-forth discussions, emails, and shipping for material and feedback
- Negative environmental impacts (printing, shipping, etc.)

# Better Features

## Better Questions

With a purpose-built authoring interface, BetterExaminations Question is the most comprehensive exam creation tool.

With over **40 question types**, the system caters for all disciplines and requirements across the campus. From Chemistry to Mathematics, long-form essays to multiple-choice, the system covers all exam authors' needs to create comprehensive, effective examinations that move beyond closed questions.

Over time, exam authors can build up an array of questions and store these in the Question Banks for future assessments.

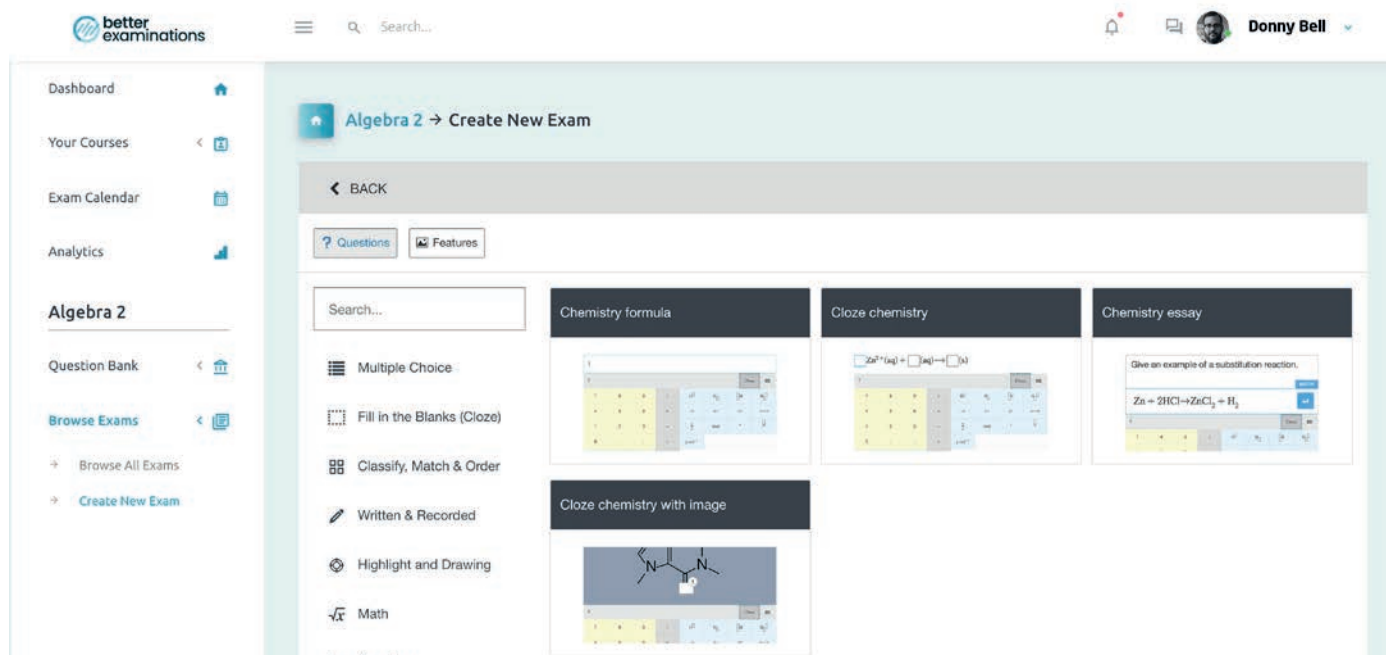

By harnessing the power of technology, BetterExaminations Question lets you go further than conventional paper-based exams. Students can even give answers to questions through audio and video responses, giving you opportunities for more creative forms of assessment.

With accessibility requirements controls, exam authors can establish time allocation per examination and randomise questions from the question bank.

# Better Features

## Better Workflow

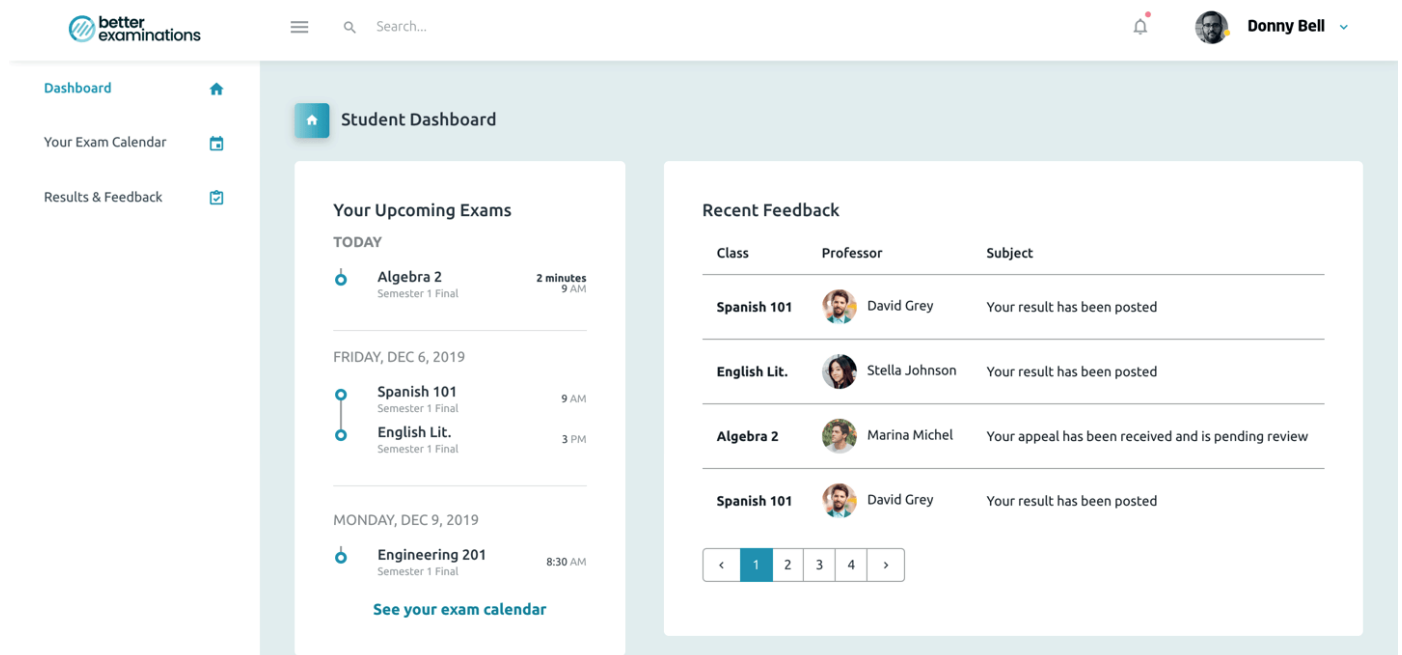

The structured Workflow feature lets you provide access to all examiners to approve and suggest edits for assessments.

Workflow allows central examination-related offices and staff to get an overview of the examination process and track the progress of the examinations from start to finish.

Workflow delivers a **robust quality-assurance** framework designed specifically to allow internal and external examiners to view and manage draft questions and exam material.

# Better Features

The screenshot shows the 'Student Dashboard' of the Better Examinations system. On the left is a sidebar with 'Dashboard', 'Your Exam Calendar', and 'Results & Feedback'. The main content area is divided into two sections: 'Your Upcoming Exams' and 'Recent Feedback'.

**Your Upcoming Exams**

Date	Class	Time
TODAY	Algebra 2 Semester 1 Final	2 minutes 9 AM
FRIDAY, DEC 6, 2019	Spanish 101 Semester 1 Final	9 AM
	English Lit. Semester 1 Final	3 PM
MONDAY, DEC 9, 2019	Engineering 201 Semester 1 Final	8:30 AM

## Better Experience

Create a fluid examination experience for your students in a **single secure system**.

BetterExaminations provides the most comprehensive and user-friendly exam experience by taking the student through a step-by-step verification and testing process. Here, students can easily identify the time remaining and number of questions and form their answers in an intuitive interface.

# Better Features

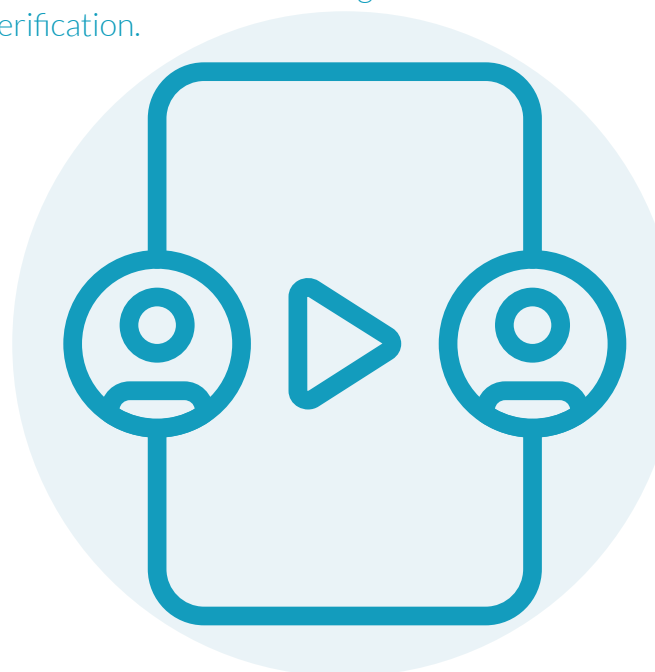

## Better Accessibility

Accessibility gives everyone the chance to succeed; that's why exams with BetterExaminations Experience are rich with **WCAG 2.1-compliant accessibility** features like screen reader support, keyboard navigation, and contrast adjustment.

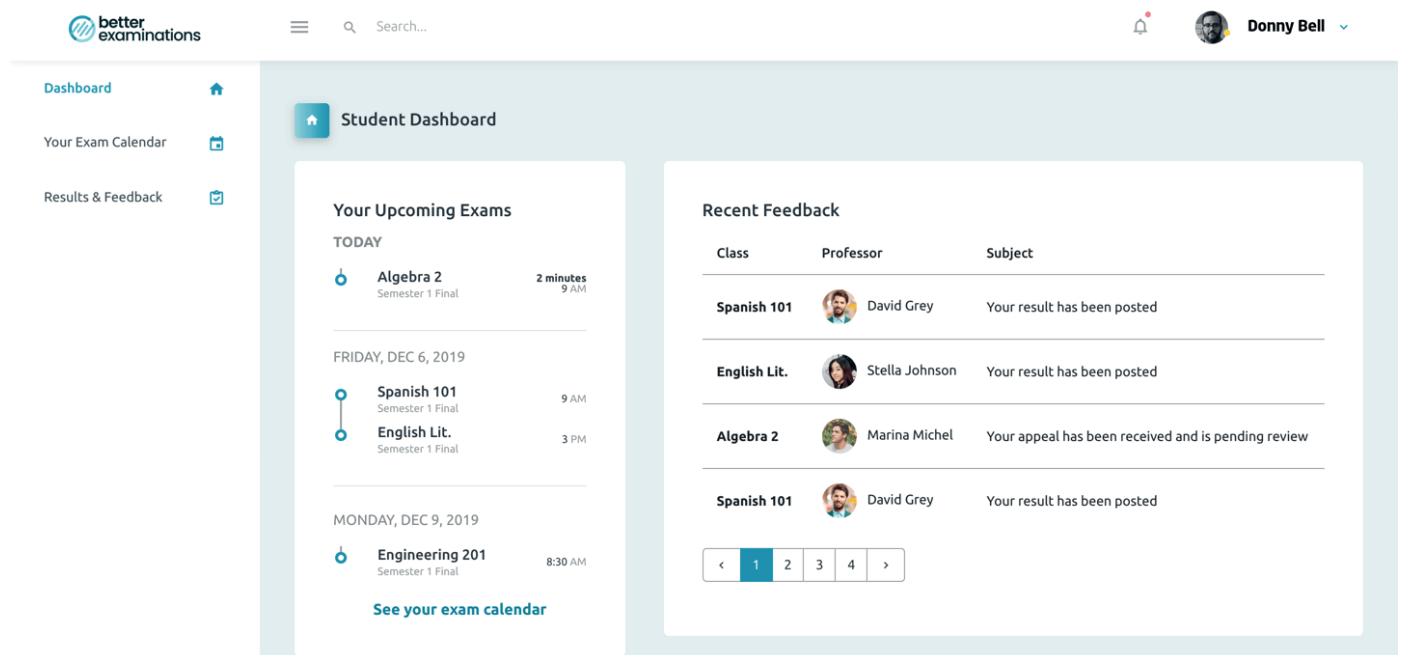

With online exams, you can make your assessments more accessible and provide for students who need tailored exams or additional support, while knowing that the invigilation will be accurate and reliable.

By locking and recording the screen, audio, and web camera, the system ensures that the student is invigilated throughout the test by identifying suspicious behaviour like eye movements, keystroke changes, and adjustments to lighting.

Each exam-taker is given a trust score, and low-scoring exam-takers are flagged for follow-up. This eliminates human error, bias, and much of the expense associated with remote invigilation and identity verification.

# Better Features

The screenshot shows the 'Student Dashboard' of the Better Examinations platform. The top navigation bar includes the 'better examinations' logo, a search bar, a notification bell, and a user profile for 'Donny Bell'. The left sidebar contains links to 'Dashboard', 'Your Exam Calendar', and 'Results & Feedback'. The main content area is divided into two sections: 'Your Upcoming Exams' and 'Recent Feedback'.

## Better Connect

Connect back with your students with our rich feedback and moderation tool.

This feature lets examiners score students for definitive answers and also provides a **grading rubric tool** to provide more detailed feedback responses like essays and mathematical problem-solving.

BetterExaminations Connect also lets external examiners anonymously inspect grading efforts and offer suggestions and corrections.

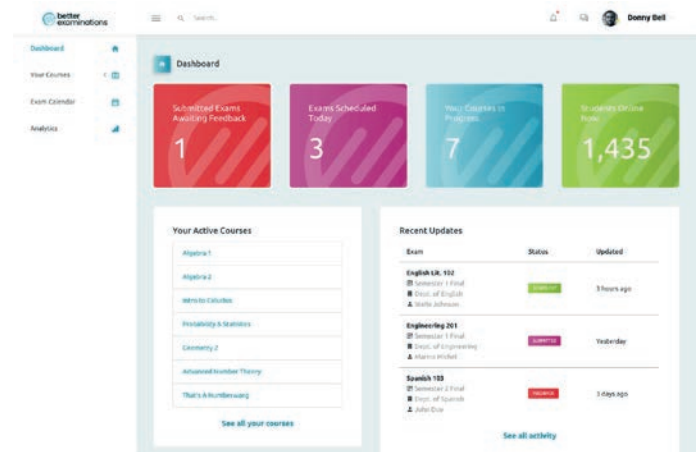

# Why Better Examinations?

## Holistic all-in-one solution

BetterExaminations is a complete solution to manage the entire exam process from initial request to exam paper delivery. Every user has secure access points.

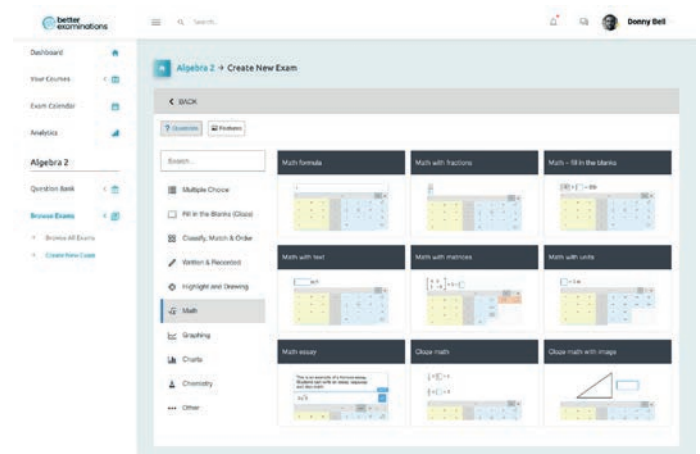

Already have a Learning Management System? BetterExaminations integrates closely with your existing LMS, so staff and students don't have yet another platform to sign in to.

## Complex and flexible questions

We don't just offer one way to solve a problem: BetterExaminations can easily handle complex testing requirements for science, mathematics, and other advanced assessment questions.

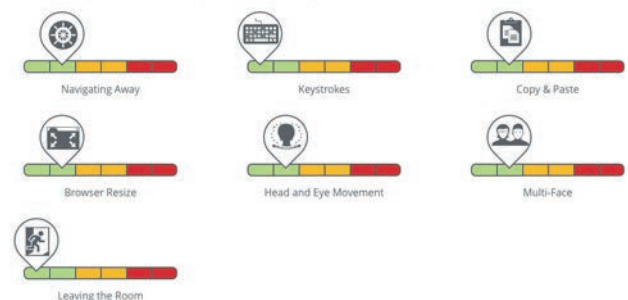

While other systems limit the type and number of assessment questions, BetterExaminations offers more than 40 question types, letting you deliver exams as simple or complex as needed.

## Reliable invigilation in a secure testing environment

Machine learning invigilation technology offers reliable invigilation, free from human error, bias, and limitations. This highly scalable automated technology verifies the student's identity and protects against misconduct.

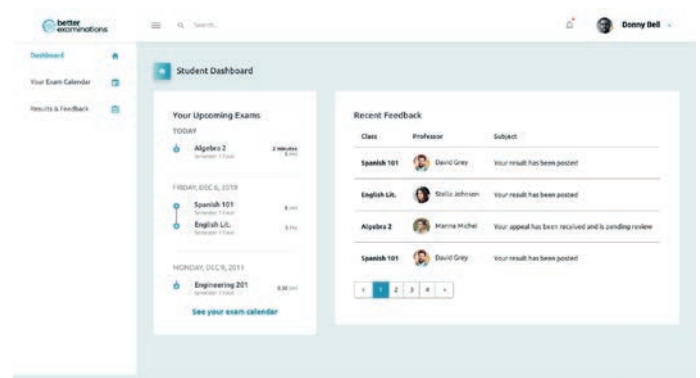

The severity of each metric sets the weight of a suspicious behavior in relation to the other behaviors. These metrics are calculated with each image. Each characteristic is derived for every image, regardless if the setting is enabled or not. The severity of these metrics can be changed at any time which will result in a re-calculation of the suspiciousness of a Proctorio proctored exam.

## Environmentally sustainable

Universities and colleges can reduce their environmental footprint by:

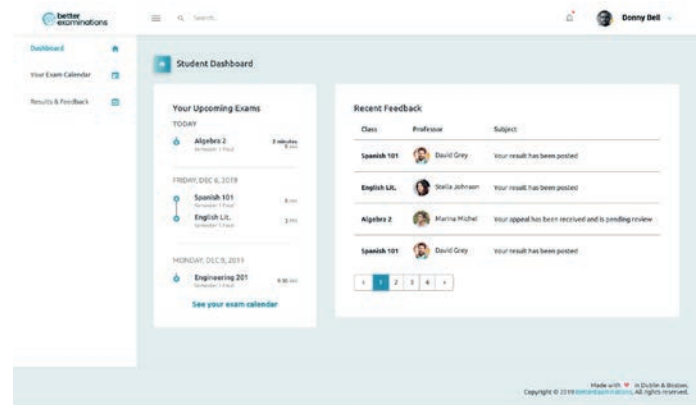

- Reducing printing of exam papers, materials, and reports.
- Reducing the need for office supplies like USB drives, boxes, tape, envelopes, and bubble wrap.
- Reducing carbon emissions from shipping exam materials.

# Why Better Examinations?

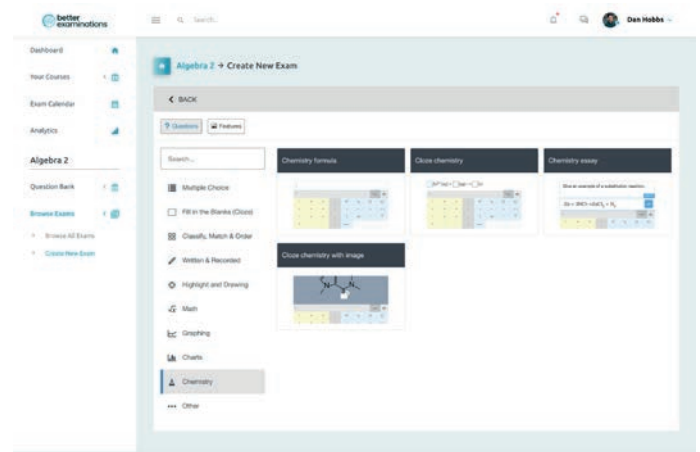

## Positive student experience

Students use technology to learn but are still asked to write paper exams. BetterExaminations offers a consistent and professional assessment experience for students in a visually appealing and easy-to-use platform. Online exams are also an attractive offer to students who want flexibility and balance for their personal/work and study lives.

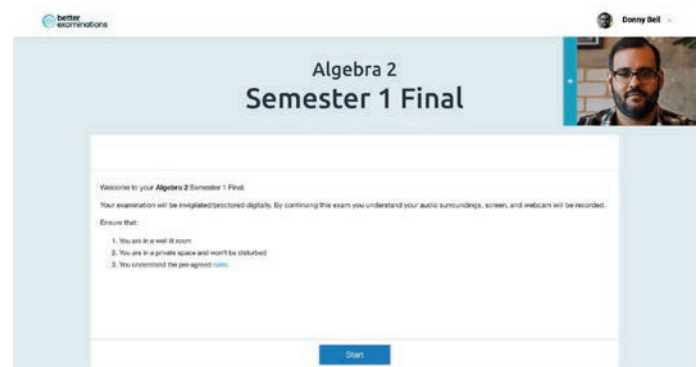

## Improved tools for academic staff

Academics will find several advantages to using BetterExaminations, with streamlined processes to create, deliver, and mark examinations. They'll have more autonomy to manage exams independently, reducing strain on exam offices and saving time and stress.

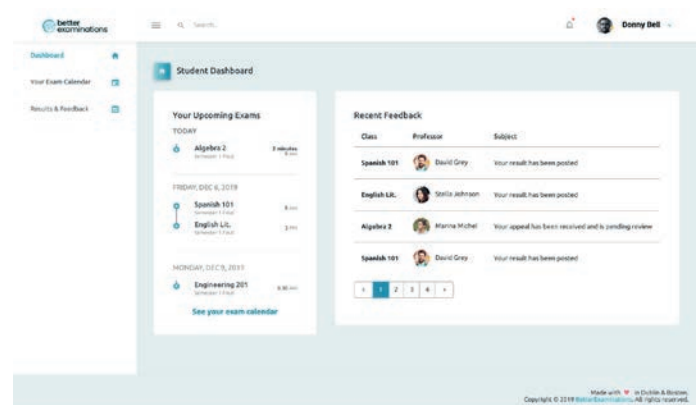

## Innovative assessments

BetterExaminations offers the potential to offer new forms of assessment, with expanded assessment capabilities and an interactive platform for students.

## Increased quality and compliance

BetterExaminations improves the integrity and security of your examinations and offers increased compliance and standardisation of examination processes. It ensures quality control, makes auditing and reporting simple, and reduces the possibility of student misconduct.

# Even more reasons

## Scalability

As the needs of your institution grow, BetterExaminations can easily scale up. And with machine learning invigilation, you can increase the numbers of exams at a much lower cost than traditional invigilated examinations.

## Cost and time savings

Online exams can drastically reduce administrative time and costs of managing the examination creation, approval, delivery, invigilation of exams, as well as marking and transmitting results.

## Faster grade resolution

Academics can create an exam instance, mark, and moderate their exam in a streamlined process that reduces the time needed for paper exams to be transported to all exam markers. That efficiency can trickle down to students, who can get their marks quickly and retake exams faster, meaning they can make enrollment decisions earlier.

## Streamlined workflows

Your digital exams can be put through the workflows that you already have in place as part of the BetterExaminations Exam Management system. That means peace of mind, knowing your exams have been reviewed and signed off before they can be assigned to students.

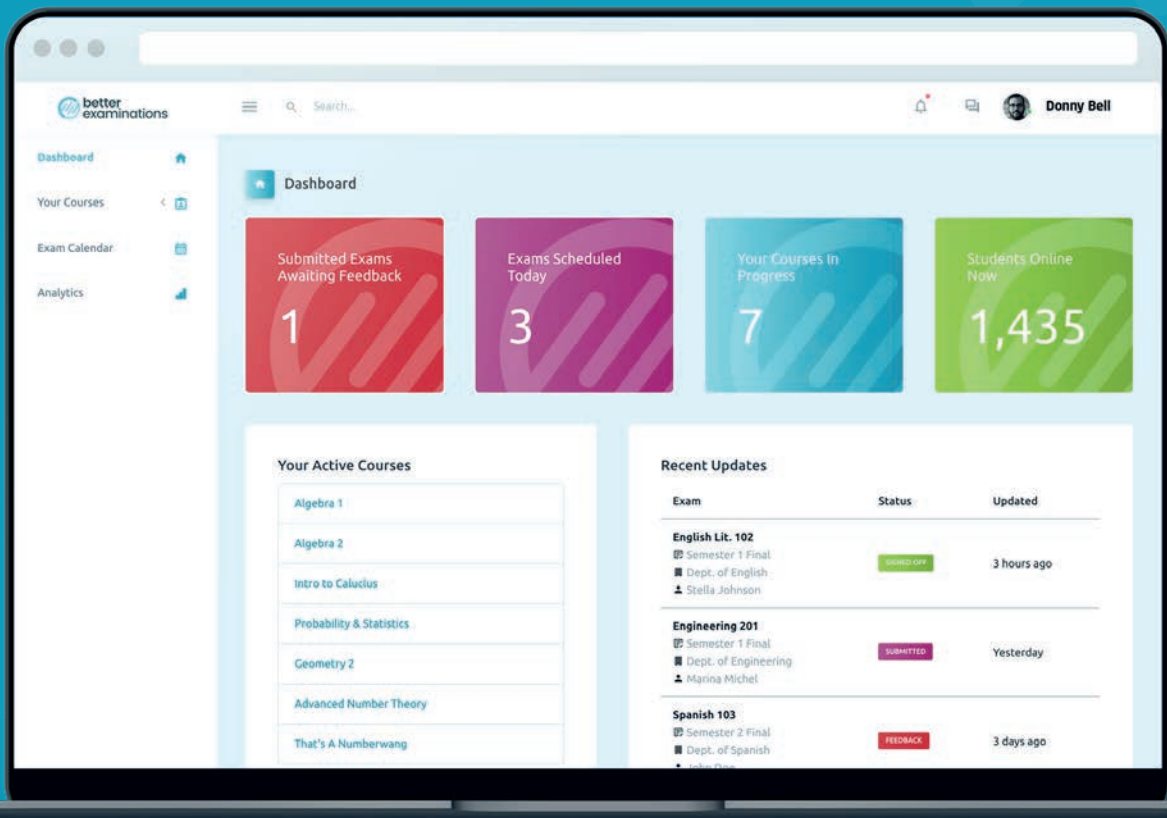

## Easy to use

BetterExaminations is intuitive and functional, and new users can get started quickly. The system was built with the aim of letting users achieve a task within or as close as possible to two clicks. This results in a great user experience with a clean, understandable interface for staff and a seamless, stress-free testing experience for students so they can maximise their performance.

## Robust security and high availability uptime

BetterExaminations offers secure end-to-end encryption, robust security and infrastructure, and better-than-99.9% uptime.

Exams and assessments  
Re-imagined online.
